

***THE PUBLIC LOCAL ESTABLISHMENT OF EDUCATIONAL AND
PROFESSIONAL AGRICULTURAL TRAINING***

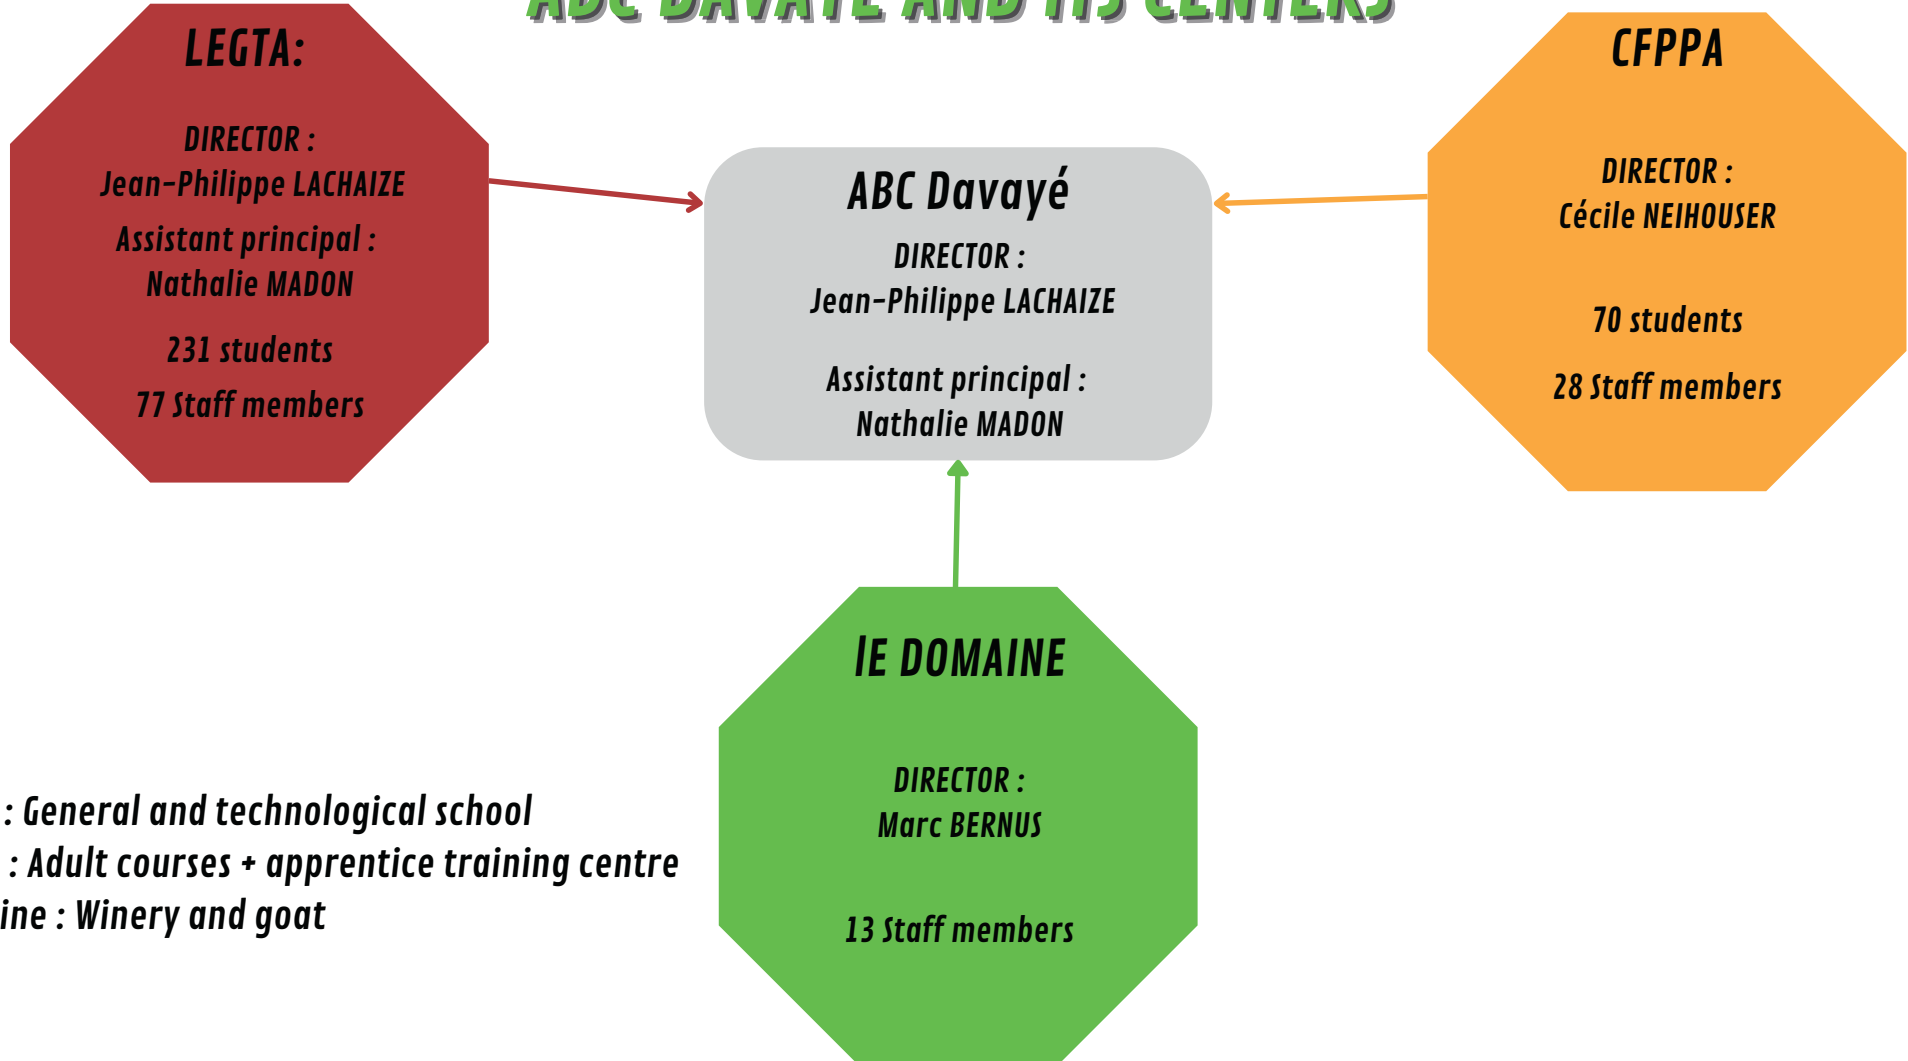

ABC Davayé is an establishment situated in the south of Burgundy (east-central of France), a famous winegrowing area. It is composed of 3 centers, whose main activity is around vineyards, wine making and wine trade. Other courses are available: science and food process, agricultural machinery, breeding.

The diplomas offered by ABC Davayé can be prepared by initial school training, apprenticeship, vocational and continuing training, enabling learners to have access to university level.

ABC DAVAYÉ AND ITS CENTERS

- **LEGTA** : General and technological school
- **CFPPA** : Adult courses + apprentice training centre
- **Domaine** : Winery and goat

OUR MISSIONS

The article 811-1 of the Code rural et de la pêche maritime Français states EPLEFPA accomplishes the following 5 missions :

1

Give general, technological and professional courses

2

Participates to the development of the local area and its animation

3

Contribute to the insertions of young people and adults to schooling and professional social settings

4

Contribute to the development, experimental and innovative activities in the field of agriculture and the food industry

- **Collaborate with local and national organization**

Domaine des Poncétys

The winery domaine of the school

- **12 hectares of vines**
- **70 000 bottles produced**
- **Grape varieties: chardonnay, gamay**
- **organic agriculture**

Goat breeding farm

- **certified cheese production**
Mâconnais

Vineyards and wines

Settled at the heart of the large Solutré Pouilly Vergisson site, the Domaine des Poncétys today has 3 missions:

- It must be a real production unit, subject to market laws and economically viable.***
- It must be an educational support for the training of young people and adults.***
- Finally, it is a place for experimentation and production of references serving the agricultural profession and in partnership with research and development organizations.***

Housed in a 17th century stone building, the estate is today made up of two entities: a wine estate and a goat farm.

VINEYARDS AND WINES

The wine estate operates 12 hectares of vines spread across the Saint-Véran appellations (11.4 ha), Pouilly-Fuissé (0.30 ha) and Mâcon-Davayé (0.3 ha).

Since 2004, the estate has been engaged in a process of identifying its terroirs and climats (a climat is a plot of land delimited by a path, a forest, a stone wall, a hedge...) and which is unique by its characteristics (soil, slope, tradition...).

Our wine estate obtained organic certification in 2012. It means, our cultural practices are reasoned, biodynamic... We have a strong interest in the land before cellar step. We try to give back to the soil its original quality.

The closeness to the land is consistent with the evolution in modern viticulture (which tend towards methods affording greater respect to soil and plant balance)

VITAF PROJECT

ABC DAVAYE is the leader of an agroforestry dynamic in viticulture in our region

***Aims: produce in a context of climate change
Limit erosion
Improve water infiltration into the soil
Increase shading***

NUMEROUS EDUCATIONAL ACTIVITIES

Sports: basketball 3X3, horse riding, Trail, Climbing, Skiing, River Canoeing

Wine fairs organisation, young wine taster competition at the International Agricultural Show in Paris, organisation of professional events...

ERASMUS + PROGRAM

The reasons why we join the Erasmus + program are multiple. First of all, we want to enable students to access better professional integration at national and international level through the acquisition of European experience and skills. Then the dimension of European and international citizenship, today takes on a very important posture for our learners. Therefore they must acquire International values for better social inclusion. Finally, we want to enable students to acquire adaptability skills necessary for their personal and professional development.

Activities:

Our school is part of a consortium within the Bourgogne Franche Comté region. Therefore we have common mobility strategies for staff and students and we share our International partnerships. The Erasmus + charter allows us a sustainable development of our already established partnerships and an extension of our partners to other countries and unexplored fields.

The beneficiaries are students and staff.

In terms of results, the charter should lead to strategic partnerships and increase the professional experience of the participants. The purpose would be to disseminate and share acquisitions and work with our partners.
